PROJECT PROFILE:

➤ Minor Project: ONLINE BANKING SYSTEM

DESCRIPTION:

This project aims at creation of a secure Internet banking system. This will be accessible to all customers who have a valid User Id and Password. This is an approach to provide an opportunity to the customers to have some important transactions to be done from where they are at present without moving to bank. In this project we are going to deal the existing facts in the bank i.e.; the transactions which takes place between customer and bank. We provide a real time environment for the existing system in the bank. We deal in the method transaction in the bank can be made faster and easier that is our project is an internet based computerized approach towards banking.

➤ Major Project: NEWS PORTAL

DESCRIPTION:

In today's scenario news which is important sometimes hid due to some reasons like fear of politicians, bribe or some other reasons. So, these scams and other important news is not published in newspapers or on news channels as the person fears to disclose his/her identity and therefore chooses the option of hiding the news.

So, in order to share the important news, this concept is come in existence. The person from anywhere can upload any type of news whenever wants. He can also select the option that whether his identity will be disclosed or not.

The portal has basically three user parts where one is registered user (authentication required) who can view, add comment can have general discussion with another user and another is administrator (has an authentication) who will manage or control the website and other user (no authentication required) can only view and search.

PERSONAL SKILLS:

Team Worker, Adaptive, Result Oriented,
Willingness to learn team facilitator.
